

Bruin Meet

Idea

UCLA is a huge school, and students often have trouble finding partners or groups to study, dine, or go to social events with. With Bruin Meet, we want this experience to be easier and more approachable for all students. Any student can create an event under categories, such as studying, dining, and socializing; as a combination of Pinterest and Snapchat for UI, these events can pop up and disappear as they are created and executed.

Objective

Build a unified, interactive platform for UCLA students to search and create meetups.

Tech

- ReactJS / Django
- JavaScript
- HTML
- CSS

Design

- Homepage of trending and currently happening meetups
- Search bar for future meetups
- Create / delete / edit meetup event
- Internal chat to communicate (or connect through Fb messenger)

Desired Team Members:

- PM
- Designer (!!)
- 2 Front-end developers
- Back-end developer
