_____

Bruin TestBank

Idea

Students wait in line for a long time to get access to tests that professors have allowed for distribution. By making these resources accessible online, students will be able to obtain tests and resources for each class a lot faster and from anywhere. Professors allow many of their past exams online, mostly on their websites, but it'll be a lot more accessible by having them all in one place.

Objective

Build a public web platform for digitally accessible past exams for all classes at UCLA.

Tech

- ReactJS / Node.js / Django
- JavaScript
- HTML
- CSS

Design

- Search bar for class or professor
- Search results of class exams in pdf/doc with dates
- Class grade distribution according to year, if possible

Desired Team Members:

- PM
- Designer
- 2 Back-end developers
- 2 Front-end developers
